Appendix A Marked-up Copy of Amended Claims

1. (Amended) A gel composition, comprising:

an ester compound; and

a polymer compound <u>having at least one rigid block and one elastic block</u> selected from the group consisting of triblock copolymers, star polymers, radial polymers, multi-block copolymers, and combinations thereof,

wherein the gel composition is substantially free of mineral oils, wherein the ester is represented by one of the following formulas:

$$\begin{bmatrix} \mathbf{R_1} - \mathbf{O} - \mathbf{C} \end{bmatrix}_{\mathbf{n}} \mathbf{R_2}$$

or

20. (Amended) A gel composition, comprising:

a compound selected from the group consisting of alcohols, ethers, naturally occurring fats and oils, and combinations thereof; and

a polymer compound selected from the group consisting of diblock copolymers, triblock copolymers, star polymers, radial polymers, multi-block copolymers, and combinations thereof.

25. (Amended) A method of making a gel composition, comprising:

mixing an ester compound with a polymer compound <u>having at least one rigid block and one</u> <u>elastic block</u> selected from the group consisting of triblock copolymers, star polymers, radial polymers, multi-block copolymers, and combinations thereof,

heating the mixture;

agitating the mixture until the mixture becomes homogeneous; and cooling the mixture,

wherein the gel composition is substantially free of mineral oils, wherein the ester is represented by one of the following formulas:
